Professional Summary

Recent B.Tech (Information Technology) graduate with hands-on experience in full-stack web development using React.js, Node.js, Express.js, MongoDB, SQL, and REST APIs. Proficient in Java and JavaScript with strong foundations in OOP, Data Structures, Algorithms, and SDLC. Passionate about problem-solving, learning new technologies, and building high-quality software solutions in collaborative Agile environments.

Education

PSNA College Of Engineering and Technology	<i>Dindigul, Tamil Nadu</i>
Bachelor of Technology - IT	CGPA: 8.13 <i>2022 - 2026</i>
Cheran Vidhyalaya Matric Hr Sec School	<i>Dindigul, Tamil Nadu</i>
HSC - Computer Science	Score: 84.6 <i>2021 - 2022</i>
SSLC	Score: 87.0 <i>2019 - 2020</i>

Experience

Lavendel Consulting	<i>December 2025 – March 2026</i>
Intern Trainee - Certificate	<i>Remote</i>
- Developed and tested scripts to implement real-time client requirements across PriceFX platform modules including Analytics, Price Setting, Quoting, Agreements and Promotions, and Rebates. - Collaborated with senior engineers to optimize API selection and data-processing logic, improving script efficiency. - Followed software quality processes, participated in code reviews, and contributed to debugging and root cause analysis of defects.	
Infosys - Springboard	<i>December 2024 – January 2025</i>
Web Developer Intern	<i>Remote</i>
- Designed, developed, and tested a scalable MERN-based web application with RESTful APIs for product management, following SDLC practices. - Executed 50+ test cases, performed thorough debugging, and improved overall reliability and performance by 20%. - Collaborated effectively using Git, participated in peer code reviews, and contributed to sprint-based development.	

Projects

Food Delivery Platform	<i>April 2026 - May 2026</i>
Technologies Used: React.js, Node.js, Express.js, MongoDB, JWT, REST APIs	
Repository Link: https://github.com/sunilkumar1701/Food_Delivery	
- Built a complete full-stack application with user authentication, cart management, order processing, and real-time data handling; wrote clean, maintainable code following software quality standards. - Designed and implemented secure RESTful APIs for food items, users, orders, and admin; integrated MongoDB Atlas and JWT authentication; deployed on Render. - Validated functionality through end-to-end testing and debugging; resolved defects by analyzing system behavior and logs.	
Ping to Mail	<i>January 2025 - March 2025</i>
Technologies Used: React.js, Node.js, Express.js, Gmail IMAP, REST API, WhatsApp Cloud API	
Repository Link: https://github.com/sunilkumar1701/Ping_To_Mail	
- Developed a full-stack email automation system using React.js and Node.js to monitor Gmail inboxes via IMAP and forward real-time alerts to WhatsApp. - Integrated REST APIs and secure Gmail App Password authentication for automated message delivery and email parsing. - Built scalable backend services with continuous monitoring, secure authentication, and real-time status handling; validated via systematic debugging.	

Technical Skills

Programming Languages: Java , JavaScript
Frontend Technologies: React.js, HTML5, CSS3
Backend Technologies: Node.js, Express.js
Databases: MongoDB, SQL
API Development: RESTful APIs, API Integration
Version Control: Git, GitHub
Core Computer Science: Data Structures, Algorithms, Object-Oriented Programming (OOP), SDLC, Agile Development

Certifications

Deloitte (Forage): Technology Job Simulation (2026)
J.P. Morgan (Forage): Software Engineering Job Simulation
Infosys Springboard: Web Developer Certification
Coursera: Front-End Web Development (2023)
Google (Coursera): Crash Course on Python (2023)
Simplilearn: OOPs in Java (2025)
